Very good game in general for the price. There's still a lot of work to be done before I can say it is completed, but as long as they keep the updates and bug fixes coming, it could become a very good hack n slash platformer.. Great game!. Hmmm, definitely a good game, but I wasn't able to take a close look, cuz it's too creepy for me.. This game surely is quite fun, and predictable.

The game in gameplay style will remember you of those old platformer games, where enemies have different ai for their types and different ways of dealing with, the boss fights are most likely somewhat of a bullet hell, where you have to dodge the projectiles they shoot while dealing massive damage per second to it, but the game is still somewhat fun, but the major problem with the game, is the music. It is boring, and unfitting for both the game, the art style and the situation.

The music is calm on almost every stage, which degrades the gameplay slowly alongside making you feel sleepy after playing for too long. But at least is bearable.

If you are looking for a game just to have some fun, you may get this during this sale, because I'm not sure if I would buy this game with its full price.. This game is not an 4x game. Fie is a qt. I throw a lot of parties and I thought it would be fun to have a Vive.

My cousin suggested ROM and I am so glad he did!

This game is so much fun, especially competing against each other.

I definitely did not have the highest score of the night, but I highly recommend this game, especially in a group setting.. and member... member mecha game from childhood?

Man this game had me chewing my fingers in frustration at times haha. But That\u2019s quickly forgotten with the hilarious deaths, nice game, very difficult but a good time killer if you like frustrating games. Still has alot of bugs (basic map bugs even...) maybe add more types of cars and please oh please fix the armored car getting health damage... And fix the silly spelling mistakes, otherwise its a really good game.. Pudding and Pudding~. As Most said, This game is only good if you got friends. Long since dead, gone, and withered. This isnt something you can buy and expect to get a lot of enjoyment out of.

It is Soccer with hover tanks. That much is true. The satisfaction of the exploding tanks, the heavy weaponry and the crazy stuff you cna do is also cool. But all in all, I would suggest Rocket League if anything. Same basic idea, Minus the futuristic blowy uppy weaponry. [Sadly.]

TL;DR: Buy only if you got 8+ friends who'll play it as well. otherwise, do not.. As a thirsty COG fan, i was not satisfied with this drink of a gamebook. Would recommend some other COG Products.

6/10 Too dry for me.
